BUREAU OF STATISTICS

1 Yukon Employees (based on employer payroll counts)

- The number of employees* in July, 2006 18,816
- The number of employees* in July, 2005 17,884
- The difference was an increase of 932
- As a percentage, the increase was 5.2%

* Does not include self-employed workers

In July of 2006, the preliminary number of employees* in the Yukon totalled 18,816. There were 2,343 in Goods-producing Industries, an increase of 352 employees, or 17.7%, over the July 2005 figure of 1,991. In July of this year, there were 15,998 in Service-producing Industries, an increase of 334 employees, or 2.1%, from the July 2005 figure of 15,664.

2 About the Survey of Employment, Payrolls and Hours

There are two perspectives on Yukon employment. One, based on the Labour Force Survey (LFS), provides the perspective from a sample of households reporting experience of employment and unemployment. The other, based on the Survey of Employment, Payrolls and Hours (SEPH), provides a perspective on the number of employees based on employer administrative payroll records. The LFS is generally well known and is the focus of a regular series of monthly publications by the Yukon Bureau of Statistics. SEPH is less well-known but has the advantage of being a monthly census of all in-scope businesses maintained by the Business Register Division of Statistics Canada and from a list of all businesses registered in Canada Customs and Revenue Agency's Business Number program with one or more active payroll deduction accounts. Public Institutions Division of Statistics Canada provides information for general government services at the territorial level. *However, those enterprises primarily involved in agriculture, fishing and trapping, private household services, religious organizations and military personnel of defense services are excluded.*[1] It should also be noted that **SEPH does NOT include self-employed workers** in any of its figures. In July 2006, the Labour Force Survey estimated 2,500 self-employed Yukoners.

Comparisons between the LFS estimates of employment and the SEPH report of the number of employees will reveal differences which are largely due to the exclusion of self-employed workers and employees having more than one job at a time. For example, it is entirely possible to have SEPH report 17,000 paid employees in a month which could be filled by 8,500 workers each working two jobs; or 15,000 working one job and 500 working two jobs and 333 working three jobs. Historically, the number of multiple job holders reported by the LFS has varied between 700 and 1,400 with an average of just over 1,000 from 1992 through 2005. What we do not know from the LFS is how many jobs multiple job holders held in a given month.

The most current month's figures released are always preliminary and are revised the following month. Caution should be used when using the most current month's figures as the revisions are sometimes significant.

* *also includes unclassified industry employees*

Source: Statistics Canada CANSIM Table 281-0023

x = suppressed for confidentiality
(p) = preliminary
(r) = revised

- There were 18,816 employees in the Yukon in July of this year, which is the highest total of any month since this survey began in 1991. The average number of employees in the Yukon for July 1991-2005 was 15,177; the July '06 total of 18,816 is an increase of 3,639, or 24.0% over the July average.
- The seasonal cycle in the Goods-producing sector sees more employees during the June through October time period than during the November through May months. In 2004 and 2005, the July/August months have roughly twice as many employees in the Goods-producing Industries as do January/February of each year. This is consistent with historical fluctuations observed in this sector.

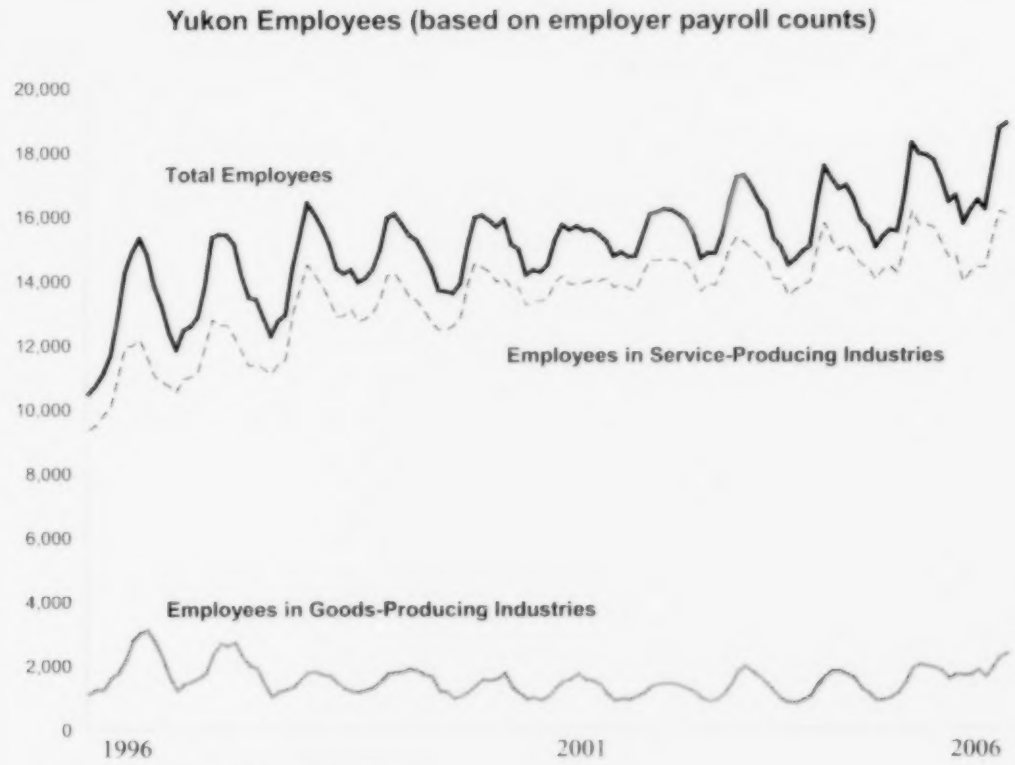
** Public adminstration includes all levels of government (federal, territorial, municipal and First Nations). Public Administration does not include teachers, college instructors etc. or health care workers who are captured in the Educational Services and Health and Social Service industries respectively.*
(p) = preliminary (r) = revised
Source: Statistics Canada CANSIM Table 281-0023

- The Service-producing sector is also influenced by seasonal fluctuations; there are more employees in the summer months, as would be expected with increased tourism traffic.
- The Accomodation and Food Services Industry, the Administrative and Support, Waste Management and Remediation Services Industry, and the Public Administration Industry all have the highest number of employees of any month since the survey began in 1991.
- From 1991 to 2005, on average for the month of July, the Public Adminstration sector has accounted for 28.3% of all Yukon employees. In July 2006, the number of employees in Public Administration (5,565) was consistent with this historical trend, accounting for 29.6% of all Yukon employees.

5 Yukon Employees, January 1996 to July 2006



Source: Statistics Canada CANSIM Table 281-0023

- The above graph highlights the cyclical nature of employment in the Yukon, with increased employees through the summer months and a decrease through the winter.
- The graph also highlights that gains in the number of employees over the last 10 years have mainly been in the Service-producing Industries.
- Notable as well is the anomaly of the number of Goods-producing sector employees in the first six months of 2006. The number of employees in this sector has held relatively steady throughout the winter months of 2005/2006 without experiencing the winter contraction historically experienced in this sector. Since May of this year, the Goods-producing sector has experienced typical summer growth.
